1. NATURE OF OPERATIONS AND GOING CONCERN

Vatic Ventures Corp. (the “Company”) was incorporated under the Business Corporations Act (British Columbia) on October 30, 2007. The Company’s shares are listed for trading under the trading symbol “VCV” on the TSX Venture Exchange (the “Exchange”). The Company is a junior resource exploration company that is involved in the acquisition and exploration of mineral properties.

The head office and principal address of the Company is located at 1400 – 1040 West Georgia Street, Vancouver, British Columbia, Canada, V6E 4H1. The registered address and records office of the Company is located at 2110 – 650 West Georgia Street, Vancouver, British Columbia, Canada, V6B 4N9.

As at May 31, 2023, the Company had a deficit of \$11,767,479 (February 28, 2023 - \$11,608,991) and a working capital deficiency of \$147,818 (February 28, 2023 - \$17,537). The Company expects to incur further losses in the development of its business, all of which indicate the existence of a material uncertainty that may cast significant doubt on the Company’s ability to continue as a going concern. These consolidated financial statements have been prepared with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The operations of the Company were primarily funded by the issuance of share capital. The issuance of additional equity securities by the Company may result in significant dilution to the equity interests of current shareholders. However, the Company’s future capital requirements will depend on many factors, including operating costs, the current capital market environment and global market conditions.

These consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

There are many external factors that can adversely affect general workforces, economies, and financial markets globally. Examples include, but are not limited to political conflict in other regions. It is not possible for the Company to predict the duration or magnitude of adverse results of such external factors and their effect on the Company’s business or ability to raise funds.

2. BASIS OF RESENTATION

Statement of compliance

The condensed consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”), and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

Approval of the financial statements

The condensed consolidated financial statements of the Company for the period ended May 31, 2023 were reviewed by the Audit Committee and approved and authorized for issue on July 28, 2023 by the Board of Directors of the Company.

2. BASIS OF RESENTATION (cont'd...)

Basis of preparation

The consolidated financial statements have been prepared on an accrual basis except for cash flow information and are based on historical costs, modified where applicable. The financial statements are presented in Canadian dollars unless otherwise noted.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries. Subsidiaries are entities controlled by the Company. All inter-company transactions and balances between the Company and its subsidiaries have been eliminated upon consolidation.

The subsidiaries are consolidated from the date on which control is transferred to the Company and will cease to be consolidated from the date on which control is transferred out of the Company. The Company also assesses existence of control where it does not have more than 50% of voting power but are able to control the investee by virtue of de facto control. De facto control may arise in circumstances where the size of the group's voting rights relative to the size and dispersion of holdings of other shareholders gives the group the power to govern the financial and operating policies.

Details of the Company's subsidiaries are as follows:

	Date of Incorporation	Country of incorporation	Percentage owned May 31, 2023
VV Mining Exploration Services Mexico S. DE. R. I.	June 20, 2012	Mexico	100%
VV Mining Mexico S. DE R. I. C. V.	June 20, 2012	Mexico	100%

All inter-company transactions and balances have been eliminated upon consolidation.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, and revenue and expenses.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements are discussed below:

Significant Accounting Estimates and Assumptions

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows. Significant estimates made by management include the following:

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

1) Share-Based Payments

Equity-settled share-based awards are recognized as an expense based on their fair value at date of grant. The fair value of equity-settled share options and warrants are estimated through the use of a valuation model – Black-Scholes, which require inputs such as the risk-free interest rate, expected dividends, expected volatility and the expected option life, and is expensed over the vesting period. Using different input estimates or models produces different option values, which would result in the recognition of a higher or lower expense.

2) Economic recoverability of exploration and evaluation assets

Management has determined that exploration and evaluation costs incurred which were capitalized have future economic benefits and are economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geological and metallurgic information, history of conversion of mineral deposits to proven and probable reserves, scoping and feasibility studies, accessible facilities, existing permits and life of mine plans.

3) Income taxes

Provisions for income and other taxes are based on management's interpretation of taxation laws, which may differ from the interpretation by taxation authorities. Such differences may result in eventual tax payments differing from amounts accrued. Reported amounts for deferred tax assets and liabilities are based on management's expectation for the timing and amounts of future taxable income or loss, as well as future taxation rates. Changes to these underlying estimates may result in changes to the carrying value, if any, or deferred income tax assets and liabilities.

4) Allowance for doubtful accounts

The Company recognizes an impairment loss allowance for expected credit losses on trade accounts receivable using a probability-weighted estimate of credit losses. In its assessment, management estimates the expected credit losses based on actual credit loss experience and informed credit assessment, taking into consideration forward-looking information. If actual credit losses differ from estimates, future earnings would be affected.

These condensed interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34") as issued by the International Accounting Standards Board ("IASB"). The same accounting policies and methods of computation were followed in the preparation of these condensed consolidated interim financial statements as were followed in the preparation and described in Note 3 of the annual audited consolidated financial statements as at and for the year ended February 28, 2023. Accordingly, these condensed interim financial statements for the three month period ended May 31, 2023 should be read together with the annual audited consolidated financial statements as at and for the year ended February 28, 2023.

11. CAPITAL DISCLOSURE

The Company considers its capital structure to include the net residual equity of all assets, less liabilities. Capital is comprised of the Company's equity and any debt that it may issue. The Company's objectives when managing capital are to (i) maintain sufficient working capital to meet current financial obligations and continue as a going concern; (ii) maintain a capital structure to allow the Company to raise equity funding to finance its capital expenditures and acquisition activities; (iii) maintain creditworthiness and maximize returns for shareholders over the long term; (iv) maintain capital above minimum regulatory levels, current financial strength rating requirements and internally determined capital guidelines and calculated risk management levels.

The Company's financial strategy is formulated and adapted according to market conditions in order to maintain a flexible capital structure that is consistent with its objectives and the risk characteristics of its underlying assets. The Company manages its capital structure and makes adjustments to it in light of changes in economic circumstances. The capital for expansion was mostly from proceeds from the issuance of common shares and debt. The net proceeds raised will be used to fund the Company's working capital. There were no changes to the way the Company manages its capital during the three month period ended May 31, 2023.

12. FINANCIAL INSTRUMENTS AND RISKS

Fair values

Under IFRS, a three-level hierarchy that reflects the significance of inputs used in making fair value adjustments is required. The three levels of the fair value hierarchy are as follows:

- a) Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- b) Level 2 – Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- c) Level 3 – Inputs for assets or liabilities that are not based on observable market data.

The Company does not have any financial assets or liabilities measured subsequently at fair value.

All financial assets and liabilities approximate their fair value due to the short term nature of these instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, interest rate risk, market risk, liquidity risk and currency risk.

Credit risk

Credit risk is the risk of financial loss to the Company if a counter party to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash and receivables.

The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company's amounts receivable consist primarily of GST receivable due from federal government agencies, and shared office costs.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise the required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. At May 31, 2023, the Company had cash of \$1,189 (February 28, 2023– \$38,171), which is insufficient to settle current liabilities of \$341,582 (February 28, 2022 - \$247,065).

12. FINANCIAL INSTRUMENTS AND RISKS (cont'd...)

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity prices.

Currency risk

Currency risk is the risk to the Company's earnings that arises from fluctuations of foreign exchange rates and the degree of volatility of these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk.

The Company may have transactions that are denominated in US dollars. These transactions pose potential currency risks and may have a significant impact on the Company.

Based on the net exposures at May 31, 2023, and assuming that all other variables remain constant, a 10% depreciation or appreciation of the Canadian dollar against the US dollar would not have a significant impact on the Company's net loss and comprehensive loss.

Interest rate risk

Interest rate risk arises from changes in market rates of interest that could adversely affect the Company. The Company's current exposure to interest rate risk is limited to its cash and cash equivalents yielding interest income at varying rates. The Company's interest obligations on its credit facility, loan payable and certain accounts payable balances, are fixed. The Company's current exposure to interest rate risk is insignificant.

Commodity risk

The Company is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors the commodity prices of precious metals, and the stock market to determine the appropriate course of action to be taken by the Company. The Company's current exposure to commodity rate risk is insignificant.
